

CODEX

ZHIIHAO YIN

GAME INTERACTION DESIGNER

Master of HCI & UX Expert. Focused on cutting-edge interaction flows, high-fidelity prototyping, and premium player experiences.

TEL: 13851862002
MAIL: bruneed237@gmail.com
WEB: yyin.info
DEGREE: M.Sc. in HCI
GRAD: Dec 2025

HONORS & SKILLS

Competitions & Certifications

- 1st Prize, National Final, Computer Network Technology Challenge
- Grand Prize, National Final, 17th Bochuang Cup Embedded Design Competition
- 3rd Prize, National Final, 15th Chinese College Student Computer Design Competition
- 2nd Prize, Liaoning Computer Design Competition
- IELTS 6.5 | CET-6. Proficient in English documentation and verbal communications.

Skill Radar

- UX Design & Software
 - Figma
 - Axure RP
 - Unity UGUI
 - Adobe XD
 - Sketch
 - UI Motion Design
 - Interactive Prototypes
 - PRD/UX Specs
 - Blender
 - Web Frontend
- Advanced HCI & Research
 - HCI
 - User Experience
 - Usability Testing
 - FSM Logic
 - SPSS Analysis
 - NVivo Coding
 - Cognitive Modeling
 - Spatial 3D UI
- Core Attributes & Communication
 - Abstraction & Logic
 - Cross-Functional Collab.
 - Info Organization
 - English Fluency
 - High-Stress Resilience
 - PC/Console Gamer

EDUCATION

2024.09 - 2025.09 UNIVERSITY OF NOTTINGHAM (UK)

M.Sc. in Human-Computer Interaction | Master's Degree

Core Courses: Gameplay & Level Design, Game Production in Unity, Mixed Reality (MR) Interaction, AI-Assisted UI Design, Advanced HCI Methods, Design Ethnography, Interaction Specification Design.

- Academic Project - VR Rhythm Game Interaction Prototype: Headed development of an audio-reactive VR rhythm prototype; designed and implemented 3D spatial UI anchoring and high-frequency tactile interactive areas in Unity, polishing hand-tracking UX for smooth player input.
- Academic Project - End-to-End Usability Testing & UX Analysis: Led contextual observations, surveys, focus groups, and usability tests. Modeled user cognitive patterns, compiled interaction diagnostic reports, and formulated 6 spatial computing UI design guidelines.

2020.09 - 2024.07 DALIAN UNIVERSITY OF SCIENCE AND TECHNOLOGY

B.Eng. in Internet of Things Engineering | Bachelor's Degree

Ranked 1st | GPA 4.1/5.0

Academic Honors: First-Class Golden University Scholarship recipient.

Core Courses: Human-Computer Interfaces, Web Development, IoT Systems, Computer Networks.

- Academic Project - IoT Visual Interface & Control Dashboard: Independently designed and developed a Web-based IoT monitoring console. Structured information design and flow layouts in Figma, established interface specifications, and created a responsive dashboard for seamless control.

WORK EXPERIENCE

2026.02 - 2026.05 MIAO INC. (SHANGHAI)

Game Interaction Designer & Developer

Core Responsibilities: Directed interaction flow designs, high-fidelity prototyping, UX documentation (Axure/Figma), and AI-driven UGUI layouts/animations for multiplayer titles "Five-Star Citizen" and "Bombing Blind Shot".

- Gameplay & System Interaction ("Five-Star Citizen"): Led interaction planning and user flow mapping for core open-world systems. Translated gameplay requirements into complete Figma high-fidelity prototypes and logical flowcharts. Drafted UX specifications and coordinated with UI/dev teams to deploy interactive controls, raising onboarding satisfaction by 30%.
- End-to-End UX & Prototyping ("Bombing Blind Shot"): Independently directed the full UX system from 0 to 1 on Roblox, including UI grids, interactive HUD layouts, tactile 3C control feels, and high-quality UI transition animations; optimized cross-platform screen resolution layouts, successfully acquiring 22,000+ players.
- AI-Assisted Prototyping & Pipeline Acceleration: Built custom AI Agent Skills and MCP servers to streamline UGUI assets slicing and layout validation; automated collision checks for interactive buttons across diverse screen aspect ratios, cutting R&D design cycles by 50%.

2023.09 - 2024.02

SHANGHAI HUICHENG TECHNOLOGY CO., LTD. (DIGITAL TWIN R&D CENTER)

Server & Interaction Development Intern

- Enterprise PDM UX & Information Architecture: Refined UX layouts and hierarchical navigation structures for complex industrial BOM systems and 3D topological twins; simplified user operations to dramatically lower cognitive load for engineering users.
- Real-Time Synchronization & Feedback Loops: Created WebSocket telemetry interfaces with sub-millisecond updates, ensuring immediate tactile UI responses and state indicators in digital twin scenes.

PROJECT EXPERIENCE

2025.01 - 2025.06 WARHAMMER DIGITAL LINE USER RESEARCH

Game User Researcher (University of Nottingham Campus Collaboration Project)

Responsibilities: Led player research for the Games Workshop Warhammer digital ecosystem. Utilized mixed-method studies to diagnose and optimize interactive UI flow pain points.

- Mixed-Method Inquiries & UX Audits: Administered quantitative surveys and qualitative interviews to gather global player feedback. Analyzed 200,000+ words of user diaries in SPSS/NVivo to identify interactive flow friction and information design bottlenecks.
- UX Diagnoses & Interaction Hierarchy Flatness: Discovered that deep nested menus and steep narrative barriers in the mobile Army Builder app drove 18-24 age group churn. Authored a 50-page UX Evaluation Report submitted directly to the Digital Director.
- Interface Guidelines & Retention Impact: Formulated new flattened navigation structures and progressive lore onboarding guidelines, reducing mobile new-player 3-day churn by 25%.

2025.03 - 2025.06 "MILLENNIUM MIST" - GAMEPLAY VALIDATION PROTOTYPE

Solo Unity Developer & Interaction Designer

Responsibilities: Built a highly polished action-shmup prototype as a solo developer to explore gameplay loops combining bullet-hell elements and platforming.

- Combat HUD & 3C Tactility Calibration: Designed complete interaction frameworks for an action-shmup prototype in Unity. Created clean combat HUD layouts, item selection grids, and real-time state feedback panels.
- UGUI Layouts & UI Animation Systems: Programmed responsive UGUI layouts from scratch, embedding crisp transition UI animations and particle bursts for visual impact on hits, dodges, and weapon switches to maximize tactile combat UX.

2025.07 - 2025.10

"MR RECIPES" - MIXED REALITY SPATIAL INTERACTION PROTOTYPE

XR / HCI

Meta Quest 3 Lead Developer & Interaction Designer

Responsibilities:

Designed and built a spatial interaction cooking assistant for Meta Quest 3 to solve the UX issue of navigating recipe steps during hands-busy cooking.

⚡

3D Spatial UI & Spatial Planning:

Developed a hands-free spatial cooking interface for Meta Quest 3. Deployed eye-gaze and hand-gesture spatial controls, bypassing traditional 2D mobile screen limitations.

⚡

Kitchen Field Contextual Inquiries:

Executed field observations and think-aloud interviews; analyzed tracking failures (due to wet hands) and text occlusion to rewrite spatial UI anchor positioning, maximizing layout stability.

ACTIVITIES

Long-term Active

LOGISTICS & STAGE SUPPORT VOLUNTEER

STAGE SUPPORT

Prominent Music Festivals (Midi, Aranya, Bubble Land, etc.)

Responsibilities:

Volunteer backstage at major music events, managing high-throughput logistics, artist operations, and emergency crisis communications under pressure.

★

High-Pressure Crisis Comm & Collaboration:

Coordinated instant logistics and support pipelines in contingency events (heavy rain, equipment shifts), maintaining solid stakeholder alignment.

2022.06 - 2023.04

PRESIDENT OF MAKER SPACE

MAKER SPACE

University Interdisciplinary Technology Association

★

Operational Coordination & Information Management:

Supervised facilities, structured task schedules, and organized project pipelines for 100+ interdisciplinary members. Negotiated hardware sponsorships and funding.
